Greenway Architects

**Project Engineers:**

Gutteridge Haskins & Davey

**Design & Construction By:**

Tension Span Structures Pty Ltd

**Project Status:**

Completed

**Project Size:**

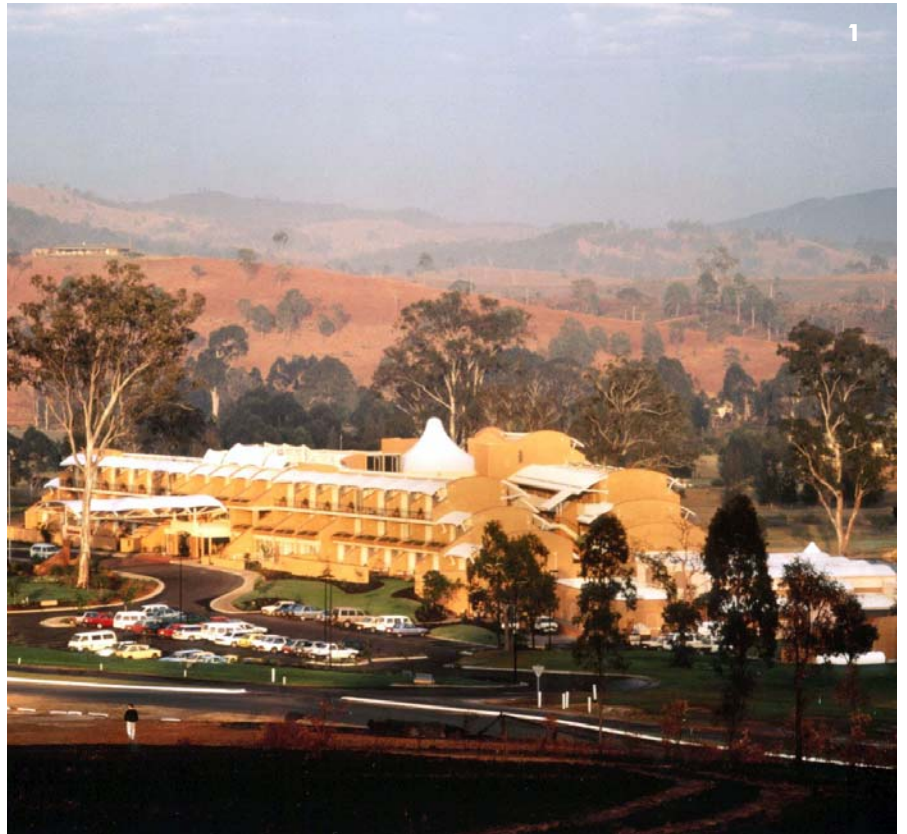

2,100 sq.m (22,596 sq.ft)

Kooralbyn Valley Resort has won RAI A Architectural Awards and the ATA Best Tourist Development Award.

Tension Membrane Rood and Canopy structures provide high quality light, shade, and weather protection.

Covering some 2,100 sq.m of permanently shaded spaces are 30 individual structures; Main Atrium, Walkways, Gazebos, Porte Cochere and Stage Canopy.

Using Seaman Tedlar Fire Resistant fabric, the tension membranes have striking doubly curved shapes in harmony with natural forms. ■
